Super Mario Odyssey Through the Web: 1st Grade Digital Quest Quiz

Picture your students jumping between pages like Mario! They'll synthesize web clues and create their own digital signposts to help friends find hidden power-ups.

1. Imagine you are building a website about pets. If you want to show a picture of a dog, which 'digital tool' should you create for your readers?

- A. An Image or Photo
- B. A loud noise
- C. A piece of paper
- D. A crayon

2. When you use a search bar to find a video about space, you are using digital information to solve a problem.

- A. True
- B. False

3. On a website, a special word you can click to 'teleport' to a new page is called a ____.

- A. Hyperlink
- B. Keyword
- C. Battery
- D. Mouse

4. You find two websites about apples. One has pictures of red fruit and one has a video of a tree. What is the BEST way to learn about how apples grow?

- A. Only look at the red fruit photo
- B. Close the computer
- C. Combine the photo and the video info together
- D. Draw a picture on a napkin

5. Everything you see on the internet is always 100% true because it is on a computer.

- A. True
- B. False
