

Name: _____ Date: _____

Answer Key: Shiny Clues: A Pre-K Map to Finding Information Quiz

Moving beyond simple play—this sensory-focused assessment uses visual cues to help early learners recognize where to find real-world information.

1. If you want to learn about a real lion, where should you look?

Answer: B) Inside a nature book

Books are great tools we use to find facts and information about real animals.

2. A teacher is a person who can help you find answers.

Answer: A) True

Teachers are helpful 'human sources' who guide us to the right information.

3. When we want to know if it is raining, we can look at a ____.

Answer: C) Weather Chart

Charts and maps provide specific information about the world around us.

4. Who wrote the words in a book?

Answer: B) The Author

The author is the creator of the information, and knowing their name is the first step in giving credit.

5. We can use a computer to find pictures of space.

Answer: A) True

Computers and tablets are digital tools that help us search for information.

6. To find out how to bake cookies, we look in a ____.

Answer: A) Recipe Book

A recipe book is a specific type of resource used to find instructions.

Name: _____ Date: _____

7. Which place has lots of books you can use for research?

Answer: B) The Library

The library is a special building filled with many different sources of information.

8. A picture can tell us facts about what a bird looks like.

Answer: A) True

Visuals like photographs are important sources of information for young researchers.

9. If we want to know a name of a butterfly, we ____ a grown-up.

Answer: C) Ask

Asking experts or adults is a basic way to gather information when we are curious.

10. Which of these is a REAL way to learn about the moon?

Answer: B) Watching a science video

Educational videos are multimedia sources that provide facts and data.
