Sowing Seeds of Tomorrow: A Pre-K Sustainability Challenge

Go beyond simple recycling; toddlers analyze resource scarcity and evaluate eco-friendly choices through high-order thinking scenarios perfect for group discussion stations.

1. Imagine your class only has one big jug of water for the whole day. If we use it all to wash our hands too fast, what will happen when we get thirsty later?

- A. The jug will magically fill up again.
- B. We will have no water left to drink.
- C. The water will turn into juice.
- D. We should pour it on the floor.

2. True or False: If we pick every single flower in the park today, there will be no flowers left for the bees to eat from tomorrow.

- A. True
- B. False

3. If we have a toy that is broken, the BEST and most helpful thing to do for the Earth is to _____.

- A. Throw it in the trash can
- B. Try to fix it or use its parts for art
- C. Buy five more toys just like it
- D. Leave it outside in the rain

4. Two children want to paint, but there is only one piece of paper left. What is the most 'fair' and sustainable way to use it?

- A. Rip the paper so no one can use it.
- B. One child uses the front, and the other uses the back.
- C. Hide the paper so nobody gets to paint.
- D. Throw the paper away and cry.

5. True or False: Using a metal spoon that we wash over and over is better for the Earth than using a plastic spoon we throw away every day.

- A. True
- B. False

6. The wind is blowing very hard! How can we use that windy energy to help us in a clean way?

- A. Use a giant fan to blow the wind back.
- B. Build a windmill to make power.
- C. Try to catch the wind in a plastic bag.
- D. Stay inside and keep the lights on all day.

Name: _____ Date: _____

7. When we leave a room, we should turn off the _____ to save energy for the future.

- A. Windows
- B. Floor
- C. Lights
- D. Shoes

8. True or False: If we want to help the Earth, it is better to walk to our neighbor's house instead of driving a big car that blows smoke.

- A. True
- B. False

9. Look at these old banana peels. Instead of putting them in the trash, where could they go to help new plants grow?

- A. Into a compost bin to turn into dirt
- B. Under your bed
- C. In the swimming pool
- D. On the TV

10. If we want to have apples next year, we must make sure we don't cut down all the _____ today.

- A. Grass
- B. Trees
- C. Fences
- D. Clouds
