

Name: _____ Date: _____

Answer Key: Shiny Screen Patrol: A 1st Grade Online Safety Quest

Young learners become digital safety heroes by choosing trusted adults and keeping personal secrets safe from the internet's strangers.

1. If a screen asks for your home address, what should you do?

Answer: C) Stop and ask a grown-up

Personal information like where you live should only be shared by a trusted adult.

2. True or False: It is okay to share your secret passwords with your best friend.

Answer: B) False

Passwords are like private keys; only you and your parents should know them to keep your accounts safe.

3. Before you click on a new game online, you should check with a _____.

Answer: A) Grown-up

Grown-ups help make sure a game is safe and friendly for children to use.

4. Which of these is a 'Private Secret' you should NOT share online?

Answer: B) Your full name

Sharing your full name can help strangers find you, so it's a private secret.

5. True or False: If a person you don't know sends you a message, you should tell a teacher or parent.

Answer: A) True

Talking to strangers online is unsafe, and a trusted adult needs to know if it happens.

6. A _____ is a person you know in real life who helps you stay safe online.

Answer: D) Trusted Adult

A trusted adult is someone like a teacher or parent who looks out for your safety.

Name: _____ **Date:** _____

7. What should you do if you see something scary or mean on a tablet?

Answer: B) Turn the screen off and tell an adult

Turning it off stops the bad thing, and telling an adult helps solve the problem.

8. Online safety means being _____ while using the internet.

Answer: C) Safe

The goal of these rules is to keep you safe and happy while learning and playing.

9. True or False: People online are always who they say they are.

Answer: B) False

Sometimes people pretend to be someone else on the internet, which is why we don't talk to strangers.

10. When you use a computer at school, you should always follow the _____.

Answer: B) Safety Rules

Safety rules are there to protect you and the computers you use for learning.
