

Name: _____ Date: _____

Answer Key: Little Explorers Ocean Water Journey Quiz

Preschoolers identify where big puddles live and how clouds make rain in this foundational introduction to the Earth's watery world.

1. Where do giant whales and colorful fish live?

Answer: B) In the big blue ocean

The ocean is a very large home filled with water where whales and fish can swim.

2. The water in the ocean tastes very salty.

Answer: A) True

Ocean water is different from the water we drink because it has lots of salt in it.

3. When water falls down from a gray cloud, we call it ____.

Answer: C) Rain

Rain is water that falls from clouds in the sky to the ground.

4. What do we call the fluffy white things floating high in the sky?

Answer: B) Clouds

Clouds are made of tiny water drops and float in the air above us.

5. The sun helps warm up the water on Earth.

Answer: A) True

The sun is like a big heater that warms up the water in oceans and puddles.

6. Water moves in a big circle from the ground to the sky and back again. This is the water ____.

Answer: C) Cycle

A cycle is something that happens over and over again, just like water moving around Earth.

Name: _____ **Date:** _____

7. If you go to the beach, what will you see a lot of?

Answer: C) Ocean water

The beach is the place where the land meets the big ocean water.

8. Can water turn into invisible vapor and go up into the air?

Answer: A) True

When water gets warm, it turns into teeny-tiny bits we can't see and floats up to the sky.

9. After the rain falls, the water often flows into a ___ to get back to the sea.

Answer: B) River

Rivers are like long water paths that carry rain back to the big ocean.

10. What should you wear if the water cycle sends rain down today?

Answer: B) A raincoat

A raincoat keeps your body dry when the water cycle drops rain on you.
