

Name: _____ Date: _____

Answer Key: Operation Teamwork: The Pre-K Champion's Sports Strategy Challenge

Designing game plans and solving social plays requires more than just running; it takes high-level coordination and creative role-sharing to win.

1. Your team is playing a 'Firefighters' game and there are too many people trying to hold the heavy water hose. To solve this problem, what is the best strategy?

Answer: B) Have half the team move to the back to clear the path

Advanced teamwork involves 'role differentiation'—assigning different jobs to different people so the group is more efficient.

2. During a relay race, instead of just waiting for your turn, you can use your voice to show ____ for your teammates.

Answer: C) Encouragement

Active participation in team sports includes verbal support, which builds group morale and improves overall performance.

3. In a team game, making a plan with your friends before the game starts is a type of strategy.

Answer: A) True

Synthesis and creation involve 'pre-planning.' Discussing roles before action begins demonstrates complex reasoning.

4. Imagine your team must move a large 'boulder' (a giant ball) across the field, but it is too heavy for one person. What should the team do?

Answer: A) Everyone push from one side at the same time

Synchronized effort—everyone working in the same direction at once—is a fundamental concept of force and teamwork.

5. If you are the leader of a 'Follow the Leader' game, you must move in a way that is ____ for your team to follow.

Answer: B) Fair

Name: _____ **Date:** _____

Leadership in sports requires considering the abilities of teammates to ensure the whole group succeeds together.

6. If your team loses a game, the best strategy for the next game is to blame your friends for the mistakes.

Answer: B) False

Analyzing results after a game (reflection) should focus on constructive changes, not blame, to foster a positive team environment.

7. You are playing a game of 'Keep the Balloon Up.' If the balloon is falling far away from you but near a friend, what should you do?

Answer: B) Call out your friend's name to alert them

Communication is a critical skill in team sports that allows players to cover areas of the field they cannot reach themselves.

8. When we play a game with many steps, like an obstacle course, we follow the ____ to make sure it is fair for everyone.

Answer: C) Rules

Rules provide the structured framework necessary for complex, multi-step physical activities.

9. In a game of 'Red Light, Green Light,' moving very slowly during the green light can be a smart strategy to stay balanced.

Answer: A) True

Strategy involves making choices about speed and body control to achieve a specific goal within the rules.

10. Your team is making a 'Human Bridge' in the gym. How do you decide who goes first in the line?

Answer: C) The team votes or takes a turns based on a plan

Synthesis in a team setting involves collaborative decision-making and creating a logical order for complex movements.
