Crypto-Crimes and Global Coinage: A 10th Grade Policy Quiz

How do decentralized currencies reshape national sovereignty? Synthesize data on financial regulation, resource scarcity, and geopolitical shifts.

1. When examining the 'technological sovereignty' of a nation like El Salvador regarding its adoption of Bitcoin, which analytical lens best evaluates the risk to its domestic monetary policy?

- A. The preservation of traditional barter systems
- B. The decoupling of local fiscal health from central bank autonomy
- C. The elimination of all physical currency manufacturing costs
- D. The immediate equalization of the global Gini coefficient

2. In the context of international relations, the use of ___ allows state actors to bypass SWIFT banking restrictions, complicating the enforcement of economic sanctions.

- A. Universal Basic Income (UBI)
- B. Bilateral trade protectionism
- C. Decentralized Finance (DeFi) protocols
- D. The gold standard model

3. True or False: The 'Proof of Work' consensus mechanism utilized by some digital assets acts as a catalyst for regional energy policy debates due to its high kilowatt-hour requirements.

- A. True
- B. False

4. Which scenario best illustrates the 'confirmation bias' often found in media coverage of volatile emerging markets?

- A. An outlet reporting only the success of a policy while ignoring its failure to help the lowest income bracket.
- B. A journalist interviewing three different experts with opposing viewpoints.
- C. A newspaper printing a retractions page for a factual error made the previous day.
- D. A news agency using data from the World Bank to verify local employment statistics.

5. The concept of 'Data Colonialism' is frequently analyzed in current events when ___ corporations harvest behavioral data from developing nations to train AI models without compensation.

- A. Multinational tech
- B. Small-scale agricultural
- C. Non-profit educational
- D. Local artisan

6. True or False: A 'Deepfake' used in a political campaign is considered a form of 'disinformation' rather than 'misinformation' because it is created with the deliberate intent to deceive.

Name: _____ Date: _____

- A. True
- B. False

7. When a city implements 'Geofencing' to control the movement of delivery robots or scooters, what is the primary civil liberties concern for residents?

- A. The aesthetic shift in urban architecture
- B. The potential for normalized location tracking of all citizens
- C. The increase in local manufacturing jobs
- D. The reduction in carbon emissions from delivery vehicles

8. Critics of 'Carbon Offsetting' in international trade argue that it creates a ___ where wealthy nations continue to pollute while paying for conservation elsewhere, avoiding systemic reform.

- A. Sunk cost fallacy
- B. Moral hazard
- C. Circular economy
- D. Zero-sum game

9. How does 'Stochastic Terrorism' differ from traditional organized political violence in a digital age?

- A. It involves a clear chain of command and written orders.
- B. It utilizes mass media to provoke 'random' acts by radicalized individuals that are statistically predictable but individually unidentifiable.
- C. It is exclusively focused on cyber-attacks rather than physical harm.
- D. It is only committed by state-sponsored intelligence agencies.

10. True or False: The use of Algorithmic Management in the 'gig economy' effectively eliminates the possibility of racial or gender bias because code is inherently objective.

- A. True
- B. False
