

Name: _____ Date: _____

Answer Key: Paw Patrol to the Rescue: Pre-K Earth Shakers Quiz

Little learners identify rumbling ground and hot mountains while playing geologist with familiar land shapes and sensory experiences.

1. What is the name for a mountain that breaths out hot, red soup called lava?

Answer: B) A volcano

A volcano is a special kind of mountain that can have hot lava inside it.

2. The ground we walk on can sometimes wiggle and shake.

Answer: A) True

When the Earth shakes, it is called an earthquake.

3. Earth has big pieces under our feet that fit together like a giant ____.

Answer: A) Puzzle

The Earth's surface is made of big pieces called plates that fit together like puzzle pieces.

4. When the Earth shakes like a bowl of Jell-O, what is happening?

Answer: C) An earthquake

An earthquake makes the ground move and rumble.

5. A mountain that lets out smoke and steam is a ____.

Answer: B) Volcano

Volcanoes often have smoke or steam coming out of the top before they erupt.

6. Volcanoes are usually very cold like an ice cube.

Answer: B) False

Volcanoes are actually very hot because of the melted rock inside.

Name: _____ Date: _____

7. What color is the hot lava that comes out of a volcano?

Answer: C) Red

Lava is usually bright red or orange because it is so hot.

8. When an earthquake happens, the ground might make a ___ sound.

Answer: B) Rumbling

The movement of the Earth can sound like a deep rumble, almost like a big truck.

9. The big pieces of the Earth move very, very slowly.

Answer: A) True

The Earth's plates move so slowly that we usually can't feel them at all.

10. Which of these looks most like the shape of a volcano?

Answer: B) A pointy triangle

Many volcanoes are shaped like a triangle or a cone with a hole at the top.
