

Name: \_\_\_\_\_ Date: \_\_\_\_\_

## Answer Key: Nail First Aid Safety Essentials for 1st Grade

Young learners design safety plans and organize survival steps for scenarios like nosebleeds, bee stings, and playground scrapes.

**1. You are playing and your friend gets a nosebleed. What is the very first thing you should do to help them?**

**Answer:** B) Tell an adult right away

In an emergency, the most important step for a child is to find a trusted adult who knows how to provide medical care.

**2. If you see a \_\_\_\_\_ on the ground, you should never pick it up because it could be sharp and carry germs.**

**Answer:** B) Used needle or syringe

Found medical waste like needles is very dangerous; students must synthesize the danger of germs and sharp objects by choosing to avoid them.

**3. True or False: If you get a bee sting, it is a good idea to tell an adult immediately in case you have an allergy.**

**Answer:** A) True

Bee stings can cause allergic reactions in some people, so notifying an adult is a critical safety step for monitoring health.

**4. Imagine you see a bottle of colorful liquid under the sink that looks like juice. What is the safest choice?**

**Answer:** C) Don't touch it and stay away

Hazardous chemicals often look like drinks; identifying a potential poison risk and choosing 'don't touch' shows advanced safety reasoning.

**5. When you are building a first aid kit for a hiking trip, you should definitely include \_\_\_\_\_ to clean a dirty scrape.**

**Answer:** B) Antiseptic wipes

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Cleaning a wound is the first step in skin first aid; students must determine which tool is functional for preventing infection.

**6. True or False: If a stranger asks you for help finding a lost puppy, you should go with them alone to be helpful.**

**Answer:** B) False

Personal safety rules teach that children should never go anywhere with a stranger without their parent's permission, even to help.

**7. You see a classmate fall on the playground and they cannot get up. What is the smartest way to show leadership in this emergency?**

**Answer:** B) Ask one friend to stay with them while you run for a teacher

This demonstrates synthesis of social roles and safety logic: ensuring the victim isn't alone while effectively seeking professional help.

**8. A \_\_\_\_\_ is a special person you can talk to if you feel unsafe or if someone is hurt at school.**

**Answer:** A) Trusted Adult

The term 'Trusted Adult' is a foundational concept in safety education, referring to teachers, nurses, or parents.

**9. True or False: Using a 'buddy system' means you and a friend look out for each other so neither of you gets lost or hurt.**

**Answer:** A) True

The buddy system is a proactive safety strategy that uses peer support to minimize risks during activities.

**10. Which of these is a 'Safety Rule' for using a public swimming pool?**

**Answer:** C) Wait for a lifeguard to be on duty before getting in

Water safety involves recognizing the importance of professional supervision (lifeguards) to prevent drowning.
