

Name: _____ Date: _____

Answer Key: Planting Seeds of Fairness: Kindergartners' Choice Garden Quiz

Empathy-driven decision making and perspective-taking. Students analyze how sharing a favorite toy or waiting a turn impacts the feelings of friends and neighbors.

1. If you have two stickers and your friend has zero, what is the kindest thing to do?

Answer: B) Give one sticker to your friend

Sharing helps everyone feel happy and included, which is a key part of making fair choices.

2. If you accidentally break a friend's crayon, you should tell the truth even if you are scared.

Answer: A) True

Honesty is a 'virtue,' which means doing the right thing for our character even when it's hard.

3. When we wait our turn for the slide, we are showing _____.

Answer: C) Patience

Patience is a choice that makes the playground fair and safe for all children.

4. A new student is sitting alone at lunch. What is the most 'virtuous' or good choice?

Answer: B) Ask them to come play with you

Being inclusive is a virtuous action that shows you care about the feelings of others.

5. Doing what is best for the whole class is more important than doing only what I want.

Answer: A) True

This is a basic form of 'utilitarian' thinking, where we choose what helps the most people be happy.

6. Following the classroom rules even when the teacher isn't looking is called my _____.

Answer: C) Duty

Name: _____ **Date:** _____

Duty means following rules because they are the right thing to do, not just to avoid getting in trouble.

7. If you see a toy on the floor that belongs to the school, what should you do?

Answer: C) Put it back in its proper bin

Taking care of shared things shows respect for our community rules.

8. It is okay to take a snack that isn't yours if you are very hungry.

Answer: B) False

Even if we want something, we must respect others' property; stealing is not a virtuous choice.

9. When we think about how our actions make others feel, we are using _____.

Answer: B) Empathy

Empathy is the 'heart' of ethics; it helps us understand the consequences of our choices.

10. Two friends want to play different games. What is the fairest way to decide?

Answer: C) Play one game first, then the other

Taking turns ensures that everyone's happiness is considered, balancing different needs.
