

Name: _____ Date: _____

Answer Key: Which Way Did the Turtle Go? A Kindergarten Motion Mystery

Identify if garden friends are moving fast or slow and trace their paths to solve this movement mission.

1. If a little yellow ducky is swimming in a straight line, which way is it going?

Answer: B) In a flat path like a ruler

A straight line means the ducky is moving in one direction without turning.

2. A fast rocket ship takes a long time to move from one spot to another.

Answer: B) False

Fast things move very quickly and take a short time to reach their destination.

3. A snail moves very ___ compared to a hopping bunny.

Answer: C) Slow

Snails are known for their slow motion, while bunnies move quickly when they hop.

4. Look at the playground! Which toy moves 'Round and Round'?

Answer: C) The Merry-Go-Round

A merry-go-round moves in a circle, which we call round and round.

5. When a ball stops moving, it stays in the same spot.

Answer: A) True

When something stops moving, its position does not change anymore.

6. A balloon that pops out of your hand goes ___ toward the sky.

Answer: B) Up

Helium balloons move 'up' away from the ground when let go.

Name: _____ **Date:** _____

7. Which animal moves the fastest in the jungle?

Answer: B) A running cheetah

A cheetah runs with a very high speed, making it the fastest one listed.

8. If you walk backwards, you are still moving.

Answer: A) True

Moving is any change in where you are, no matter which direction you go!

9. How does a yo-yo move on its string?

Answer: C) Up and Down

Yo-yos are designed to move down the string and back up to your hand.

10. To start moving a heavy toy box, you usually give it a ____.

Answer: B) Push

A push is a way to start the motion of an object.
