

Name: _____ Date: _____

Answer Key: Bat Ears and Cat Eyes: Pre-K Noisy and Bright Wonders Quiz

How do animals use their bodies to find friends and toys? Identify loud jungle sounds and bright sunshine sources in this sensory discovery.

1. Which of these makes a loud sound when you play with it?

Answer: B) A drum

Banging on a drum makes a big vibration that we hear as a loud sound.

2. We use our eyes to hear music.

Answer: B) False

We use our ears to hear sounds and our eyes to see light.

3. Which of these helps you see in a dark room?

Answer: B) A flashlight

A flashlight sends out light beams so we can see what is around us.

4. What part of your body tells you that a fire truck is making a 'wee-woo' sound?

Answer: C) Your ears

Our ears are the special tools our bodies use to catch sound waves.

5. The sun is very bright and gives us light.

Answer: A) True

The sun is our biggest source of light during the daytime.

6. When you whisper, you are making a ___ sound.

Answer: A) Quiet

Name: _____ **Date:** _____

Whispering is a way to move just a little bit of air to stay quiet.

7. Which animal makes a very quiet sound?

Answer: B) A tiny mouse

Mice make teeny-tiny squeaks that are very quiet compared to lions or dogs.

8. Closing your eyes makes it look dark.

Answer: A) True

When we close our eyelids, we block the light from getting to our eyes.

9. A heavy thunderstorm makes a loud sound called ____.

Answer: B) Thunder

Thunder is the booming sound we hear during a storm.

10. What happens when you turn off the lamp at night?

Answer: A) The room gets dark

When there is no light source, like a lamp, it becomes dark.
